

## *SOC 4650/5650: Week 12 ArcGIS Quick Reference*

*Christopher Prener, Ph.D.*

*April 4<sup>th</sup>, 2017*

### *Create 'Clean' Feature Class*

Toolbox ▸ Conversion Tools ▸ To Geodatabase ▸ Feature Class to Feature Class and then fill out the Input Features, Output Location<sup>1</sup>, and Output Feature Class name. Use the Field Map to select which attributes will be included in your new feature class (the X icon deletes attributes and the + icon adds attributes). You can use the up and down arrows to re-order attributes.

<sup>1</sup> *Must be a geodatabase.*
